

# CHARACTER CONSISTENCY GUIDE

Create highly consistent  
AI characters across  
different images, scenes  
and environments.

WORKFLOW 1 • EXPRESS IMAGE

ONE IMAGE

ONE PROMPT

ONE CONSISTENT  
CHARACTER

[pyrosaicreative.com](https://pyrosaicreative.com)

## Welcome to the PYROS Express Workflow

**Create highly consistent AI characters from a single image in just minutes.**

The **PYROS Express Workflow** transforms a single character image into a professional **Character Reference Sheet** designed to preserve the character's identity across AI-generated images.

Whether you're creating AI actors, background characters, commercial campaigns, short films, AI influencers, animated characters, or social media content, this workflow gives you a reliable visual reference for generating your character in different scenes, poses, and environments.

The workflow works with both realistic and stylized characters, including anime, manga, cartoons, comics, 3D characters, and many other visual styles.

No complex setup.

No lengthy preparation.

**Simply upload one image, paste one optimized prompt, and generate a reusable Character Reference Sheet.**

# Why PYROS Express?

Traditional character consistency workflows can require multiple reference images, extensive prompt engineering, and a lengthy preparation process.

The **PYROS Express Workflow** simplifies the process into three steps:

**One Image → One Prompt → One Character Reference Sheet**

The result is a reusable visual foundation that helps you generate **more consistent AI images** throughout your project.

## Copyright Notice

This document is provided for personal use only. No part of this publication may be reproduced, distributed, or incorporated into commercial products without prior written permission from PYROS AI Creative.

## Purpose

Learn a simple workflow for turning a single character image into a reusable **AI Character Reference Sheet**.

You'll then use your reference sheet to create professional profile pictures and new AI images while keeping your character's identity consistent.

## Deliverables

By the end of this guide, you'll have:

- **Express Character Reference Sheet** — a reusable visual reference for your character.
- **Social Media Profile Picture Prompt** — a ready-to-use prompt for creating a polished, professional profile picture.
- **Express Image Prompt Template** — a customizable prompt for creating new social media photos based on your own ideas while keeping your character consistent.

### ***Best For:***

-  **AI influencers & social media creators**
-  **AI actors & digital characters**
-  **Commercials & advertising**
-  **Short films & cinematic productions**
-  **Background characters & extras**
-  **Realistic & stylized characters (anime, manga, cartoons, 3D)**

# About This Guide

## What Is Character Consistency?

Character consistency means keeping the **same character identity** across multiple AI-generated images.

The face, hairstyle, body proportions, and overall appearance should remain recognizable even when you change the pose, location, lighting, or scene.

## Why It Matters

Without a reliable visual reference, AI models can reinterpret your character from one generation to the next.

Faces may change, hairstyles can drift, and body proportions or other defining features may become inconsistent.

The **Express Character Reference Sheet** gives the AI a structured visual reference of your character, creating a stronger foundation for consistent image generation.

**Note:** The Character Reference Sheet can also be used as a visual identity reference for AI video generation. Video workflows are covered separately in **Part 2**.

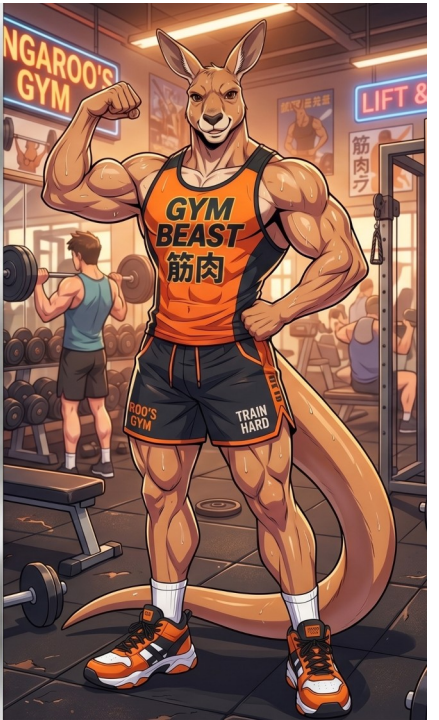

## Before You Start

Start with a high-quality image of your character.

For the best results, your source image should have:

- 😊 **Neutral facial expression**
- 👁 **Face clearly visible**
- 💡 **Good lighting**
- 🧹 **Clean or uncluttered background**
- 🔍 **High resolution**

**Your source image is the foundation of the entire workflow. The better the starting image, the stronger your reference sheet.**

## Is the Express Workflow Right for You?

The **Express Workflow** is designed for characters whose identity is primarily defined by their **face, hairstyle, body proportions, and overall appearance**.

It is ideal when you want to create consistent AI images quickly without building an extensive character reference system.

### Express Is a Good Fit When:

- 🐱 The face is the main identity
- 👕 The outfit can change
- 📍 The character will appear in different locations
- 🎬 You need different poses and scenes
- ⚡ You want a fast, simple workflow

## When You Need More

Some characters are defined by their complete visual design.

If your character depends heavily on:

- Intricate costumes
- Elaborate armor
- Multiple unique accessories
- Complex props or equipment
- Details that must remain precisely consistent

then a more advanced reference workflow may be appropriate.

## The PYROS Cinematic Workflow — Coming Soon

The Cinematic Workflow will be designed for characters where **the complete design is part of the identity**, providing a more advanced reference system for complex productions.

**Rule of thumb:** If the character is the identity, use Express.

If the design is the identity, you'll need a more advanced workflow.

# WORKFLOW — EXPRESS

Create a professional **Express Character Reference Sheet** from a **single image** using **one optimized prompt**.

The workflow is designed for speed and simplicity, giving you a reusable character reference for creating consistent AI images.

## Step 1 — Watch the Tutorial

If this is your first time using this workflow, watch the accompanying video tutorial before getting started.

**Video Tutorial:** [Link Here](#)

## Step 2 — Open Flow

Open **Flow** and create a new project.

**Flow:** [Click here](#)

For the best results:

- Model: **Nano Banana 2** or **Nano Banana Pro**
- Aspect Ratio: **16:9**

## Step 3 — Upload Your Image

Upload your character image and attach it to the prompt.

This image will be used as the identity reference for generating your Express Character Reference Sheet.

## Step 4 — Generate the Reference Sheet

Copy the **Express Character Reference Sheet Prompt** from the next page, paste it into Flow, attach your image, and generate the reference sheet.

## Step 5 — Use Your Character Reference Sheet

Attach your generated Express Character Reference Sheet to every new image or video generation.

For the best results, use the prompt templates included in this guide and refer to the Example section for practical demonstrations.

## Express Character Reference Sheet Prompt

Use the attached image as the sole source of character identity and design.

Create a professional AAA game and feature film production character turnaround sheet of this exact character.

Preserve the character with maximum fidelity, including facial identity, age, ethnicity or species, body proportions, hairstyle, facial hair, clothing, armor, accessories, weapons, materials, colors, textures, patterns, construction details, and every distinctive design element visible in the reference image.

Do not redesign, reinterpret, beautify, simplify, modernize, or alter the character in any way.

If any area is partially hidden or not visible, reconstruct it conservatively using only the established visual language of the existing design. Never invent new stylistic elements, accessories, patterns, or materials.

The sheet is intended as an official production reference for character modeling, sculpting, rigging, texturing, VFX, and collectible statue production.

Arrange the output as a perfectly aligned 4×2 grid with consistent spacing between panels.

Top row — Full Body Orthographic Turnaround:

- Front View
- Left Profile
- Right Profile
- Back View

Show the complete body from head to feet in every view.

The character must remain in a perfectly neutral A-pose with arms slightly separated from the torso, relaxed fingers, feet shoulder-width apart, and identical body proportions in every panel.

Use true orthographic production views with no perspective distortion and identical scale across all four views.

Bottom row — Head Reference:

- Front Close-up
- Left Profile Close-up
- Right Profile Close-up

- Back of Head Close-up

Maintain identical facial proportions, hairstyle, ears, beard, makeup, scars, wrinkles, jewelry, helmets, crowns, hair ornaments, and every visible facial feature across every head view.

All clothing, armor, fabrics, leather, metals, embroidery, seams, straps, belts, pouches, boots, gloves, capes, fur, weapons, and accessories must remain identical in construction, placement, scale, materials, and colors across every view. Items attached to the body must remain attached in exactly the same position.

Use a seamless pure white infinity cyclorama studio background. The background must be completely uniform with no visible corners, floor transitions, textures, gradients, props, or environmental elements.

Illuminate the character using a balanced three-point soft studio lighting setup with large diffused softboxes, producing soft natural shadows, neutral color reproduction, and clearly visible materials without dramatic contrast.

Render the sheet using a true production-reference presentation with crisp edges, perfectly centered composition, consistent scale, realistic anatomy, photorealistic materials, and exceptional geometric consistency.

Do not include action poses, perspective shots, cinematic framing, environmental elements, props, labels, text, logos, watermarks, borders, or cropping.

Every panel must depict the exact same character. The finished sheet should read as one unified production turnaround created for a professional game or VFX studio rather than eight independently generated images.

## WHEN TO USE THE RIGHT WORKFLOW

Choose the workflow that matches your character's visual complexity.

### USE THE EXPRESS WORKFLOW

Choose the Express Workflow when your character has a **clean, uncomplicated** visual design.

#### IDEAL FOR

Everyday clothing

Casual outfits

Business attire

Lifestyle characters

Few or no important accessories

Most social media, illustration, and AI filmmaking projects

### USE THE CINEMATIC WORKFLOW

Use the Cinematic Workflow instead if your character includes visual elements that must remain **highly consistent**.

#### LOOK FOR THESE COMPLEX ELEMENTS

Multiple clothing layers

Several accessories

Utility equipment

Detailed belts or harnesses

Bags or satchels

Specialized tools

Intricate costumes

#### EXAMPLES

BUSINESS PROFESSIONAL

CASUAL LIFESTYLE

STUDENT

EXPRESS WORKFLOW = SPEED + SIMPLICITY + EXCELLENT CONSISTENCY

#### EXAMPLES

ARCHAEOLOGIST

WILDLIFE PHOTOGRAPHER

FIELD ENGINEER

The additional visual information provided by the Cinematic Character Reference Sheet helps AI models preserve these details **more reliably** across images and videos.

## Example — From Image to Character Reference Sheet

See the Express Workflow in action.

Starting from a single image, the prompt below generates a professional Character Reference Sheet that can be reused throughout your project to maintain character consistency.

### Input Portrait

### Generated Express Character Reference Sheet

## Example 1 — Professional Profile Picture

A professional profile picture is one of the most common applications of the Express Character Reference Sheet.

Whether you're creating an AI actor, AI influencer, business profile, casting portfolio, website, or commercial campaign, this prompt generates clean, natural-looking portraits while preserving your character's identity.

Recommended Aspect **Ratio: 1:1**

**Customize only the highlighted placeholders.** The remaining prompt has been optimized to maximize character consistency.

### Professional Profile Picture Prompt

Use the attached Express Character Reference Sheet as the identity reference.

Preserve the character's facial features, hairstyle, eye color, skin tone, facial proportions, and overall appearance exactly as shown in the reference sheet.

The character is wearing **[OUTFIT] or [the same outfit shown in the reference sheet]**.

**BACKGROUND:** **[Example: Central Park]**

Close-up portrait.

Framed from the upper chest to the top of the head.

Body angled approximately 30°–45° toward the camera.

Head slightly turned toward the camera.

Looking slightly away from the lens.

Natural relaxed expression.

Soft genuine smile.

Relaxed shoulders.

Golden hour natural lighting.

85mm portrait lens.

Shallow depth of field.

Soft cinematic bokeh.

Photorealistic.

Editorial lifestyle photography.

Natural skin texture.

Natural colors.

No heavy retouching.

No beauty filters.

High-end commercial photography.

Portrait composition.

## See the Workflow in Action

Want to see what you can create with the **PYROS Express Workflow**?

Follow **Elena Hart** on Instagram to explore the AI images generated using this workflow, including different locations, outfits, poses, and social media scenes.

**Instagram:** [@elenahart\\_ai](#)

# Express Image Prompt Template

Your Express Character Reference Sheet is now ready to use.

Use the following prompt template to create unlimited AI images while maintaining a highly consistent character identity.

## Before You Begin

- Replace only the **highlighted placeholders** with your own descriptions.
- Fields marked **Choose One** are optional. You may select a single option or leave the section unchanged and allow the AI to determine the most suitable choice for your scene.

## Express Image Prompt

Using the attached character reference sheet, generate a photorealistic image while preserving the character's identity exactly.

Character from the attached reference sheet **ACTION** [Describe what the character is doing.] **LOCATION** [Describe the environment or setting.]

### **COMPOSITION** (choose an option)

Close-up, Extreme Close-up, Headshot, Portrait, Medium Shot, Medium Close-up, Medium Full Shot, Full Body Shot, Wide Shot, Extreme Wide Shot, Over-the-Shoulder Shot, Low Angle Shot, High Angle Shot, Eye-Level Shot, Dutch Angle, Top-Down View, Bird's-Eye View, Worm's-Eye View, Side Profile, Three-Quarter View, Front View, Back View, Dynamic Action Shot, Cinematic Frame.

### **CAMERA** (choose an option)

Sony A7R V, Canon EOS R5, Nikon Z8, Fujifilm GFX100 II, Leica M11, Hasselblad X2D, RED V-Raptor, ARRI Alexa Mini LF, 24mm lens, 35mm lens, 50mm lens, 85mm portrait lens, 135mm telephoto, Macro lens, Wide-angle lens, Anamorphic lens, f/1.2, f/1.4, f/1.8, f/2.8, f/4.

### **LIGHTING** (choose an option)

Natural daylight, Golden Hour, Blue Hour, Overcast Soft Light, Window Light, Soft Studio Lighting, Three-Point Lighting, Rembrandt Lighting, Butterfly Lighting, Split Lighting, Rim Lighting, Backlighting, Volumetric Lighting, Cinematic Lighting, Neon Lighting, Moody Low-Key Lighting, Bright High-Key Lighting, Soft Diffused Lighting, Dramatic Chiaroscuro.

### **EXPRESSION & BODY LANGUAGE**

[Describe facial expression, pose and body language.]

### **HAIRSTYLE**

Keep exactly as shown in the reference sheet.

OR

[Describe the hairstyle.]

#### **WARDROBE**

Keep exactly the outfit shown in the reference sheet.

OR

[Describe clothing, accessories and footwear.]

#### **DEPTH OF FIELD** *(choose an option)*

Very Shallow Depth of Field, Shallow Depth of Field, Moderate Depth of Field, Deep Focus, Everything in Sharp Focus, Cinematic Background Blur, Strong Bokeh, Soft Bokeh, Subject Isolation.

#### **COLOR GRADING** *(choose an option)*

Kodak Portra 400, Kodak Gold 200, Kodak Vision3, Fujifilm Pro 400H, Fujifilm Velvia, Cinematic Teal & Orange, Warm Natural Tones, Cool Desaturated Look, Moody Film Look, Neutral Editorial, High Contrast Black & White.

#### **QUALITY**

Ultra photorealistic, editorial photography, premium commercial quality, natural skin texture, realistic lighting, realistic hair strands, sharp eyes, physically accurate materials, high detail, professional color grading.

#### **PRESERVE**

Maintain facial identity, facial proportions, **hairstyle**, body proportions, skin tone, eye color, distinctive facial features, age appearance and overall appearance exactly as shown in the reference sheet.

Do not alter the character's identity.

## Example 2 — Lifestyle Café Scene

The following example shows how the **Express Image Prompt Template** can be customized to create a completely different scene while preserving the character's identity.

Only a few placeholders have been replaced. The rest of the prompt remains unchanged.

### Customized Prompt

Using the attached character reference sheet, generate a photorealistic image while preserving the character's identity exactly.

Character from the attached reference sheet is sitting by the window of a cozy café, reading a book while holding a cup of coffee.

#### **LOCATION**

A warm and inviting café in SoHo, New York. Large side window overlooking the street, wooden table, soft natural décor, subtle background activity, cozy atmosphere.

**COMPOSITION**

Medium Shot

**CAMERA**

Sony A7R V, 85mm portrait lens, f/1.8

**LIGHTING**

Window Light, Natural Daylight

**EXPRESSION & BODY LANGUAGE**

Relaxed natural posture. Sitting comfortably by the window with shoulders relaxed. Looking down at the book or out the window, never looking at the camera. Soft peaceful expression with a subtle genuine smile.

**HAIRSTYLE**

Keep exactly as shown in the reference sheet.

**WARDROBE**

Keep exactly the outfit shown in the reference sheet.

**DEPTH OF FIELD** *(choose an option)*

Very Shallow Depth of Field, Shallow Depth of Field, Moderate Depth of Field, Deep Focus, Everything in Sharp Focus, Cinematic Background Blur, Strong Bokeh, Soft Bokeh, Subject Isolation.

**COLOR GRADING** *(choose an option)*

Kodak Portra 400, Kodak Gold 200, Kodak Vision3, Fujifilm Pro 400H, Fujifilm Velvia, Cinematic Teal & Orange, Warm Natural Tones, Cool Desaturated Look, Moody Film Look, Neutral Editorial, High Contrast Black & White.

**QUALITY**

Ultra photorealistic, editorial photography, premium commercial quality, natural skin texture, realistic lighting, realistic hair strands, sharp eyes, physically accurate materials, high detail, professional color grading.

**PRESERVE**

Maintain facial identity, facial proportions, hairstyle, body proportions, skin tone, eye color, distinctive facial features, age appearance and overall appearance exactly as shown in the reference sheet.

Do not alter the character's identity.

# Express Image Prompt Builder

Your **Express Character Reference Sheet** is now ready to use.

Instead of manually filling in the **Express Image Prompt Template** every time you want to create a new image, let ChatGPT build the prompt for you.

You only need to provide three things:

**Idea / Action · Location · Wardrobe**

ChatGPT will use your information to complete the entire **PYROS Express Image Prompt Template**, selecting the most appropriate composition, camera, lighting, expression, depth of field, and color grading for your scene.

## How It Works

### 1. Set Up ChatGPT

Copy the **PYROS Express Image Prompt Builder** from the next section and paste it into a new ChatGPT conversation.

ChatGPT will reply:

**OK**

It is now ready for your image idea.

## PYROS Express Image Prompt Builder

Use the **PYROS Express Image Prompt Template** to create a complete image-generation prompt based on the photo idea I provide.

I will send you the idea in my next message.

**Only write the image-generation prompt. Never generate or create an image.**

**Reply only: "OK" and wait for my idea.**

### PYROS Express Image Prompt Template

Using the attached character reference sheet, generate a photorealistic image while preserving the character's identity exactly.

Character from the attached reference sheet **ACTION** [Describe what the character is doing.] **LOCATION** [Describe the environment or setting.]

**COMPOSITION** *(choose an option)*

Close-up, Extreme Close-up, Headshot, Portrait, Medium Shot, Medium Close-up, Medium Full Shot, Full Body Shot, Wide Shot, Extreme Wide Shot, Over-the-Shoulder Shot, Low Angle Shot, High Angle Shot, Eye-Level Shot, Dutch Angle, Top-Down View, Bird's-Eye View, Worm's-Eye View, Side Profile, Three-Quarter View, Front View, Back View, Dynamic Action Shot, Cinematic Frame.

**CAMERA** *(choose an option)*

Sony A7R V, Canon EOS R5, Nikon Z8, Fujifilm GFX100 II, Leica M11, Hasselblad X2D, RED V-Raptor, ARRI Alexa Mini LF, 24mm lens, 35mm lens, 50mm lens, 85mm portrait lens, 135mm telephoto, Macro lens, Wide-angle lens, Anamorphic lens, f/1.2, f/1.4, f/1.8, f/2.8, f/4.

**LIGHTING** *(choose an option)*

Natural daylight, Golden Hour, Blue Hour, Overcast Soft Light, Window Light, Soft Studio Lighting, Three-Point Lighting, Rembrandt Lighting, Butterfly Lighting, Split Lighting, Rim Lighting, Backlighting, Volumetric Lighting, Cinematic Lighting, Neon Lighting, Moody Low-Key Lighting, Bright High-Key Lighting, Soft Diffused Lighting, Dramatic Chiaroscuro.

**EXPRESSION & BODY LANGUAGE**

[Describe facial expression, pose and body language.]

**HAIRSTYLE**

Keep exactly as shown in the reference sheet.

OR

[Describe the hairstyle.]

**WARDROBE**

Keep exactly the outfit shown in the reference sheet.

OR

[Describe clothing, accessories and footwear.]

**DEPTH OF FIELD** *(choose an option)*

Very Shallow Depth of Field, Shallow Depth of Field, Moderate Depth of Field, Deep Focus, Everything in Sharp Focus, Cinematic Background Blur, Strong Bokeh, Soft Bokeh, Subject Isolation.

**COLOR GRADING** *(choose an option)*

Kodak Portra 400, Kodak Gold 200, Kodak Vision3, Fujifilm Pro 400H, Fujifilm Velvia, Cinematic Teal & Orange, Warm Natural Tones, Cool Desaturated Look, Moody Film Look, Neutral Editorial, High Contrast Black & White.

**QUALITY**

Ultra photorealistic, editorial photography, premium commercial quality, natural skin texture, realistic lighting, realistic hair strands, sharp eyes, physically accurate materials, high detail, professional color grading.

### **PRESERVE**

Maintain facial identity, facial proportions, hairstyle, body proportions, skin tone, eye color, distinctive facial features, age appearance and overall appearance exactly as shown in the reference sheet.

Do not alter the character's identity.

## **2. Describe Your Image Idea**

Send your idea using these three simple sections:

**Idea / Action:** What is the character doing?

**Location:** Where does the scene take place?

**Wardrobe:** What is the character wearing?

You don't need to describe camera settings, composition, lighting, or other technical details.

**For example:**

Rewrite the following idea using the PYROS Express Image Prompt Template provided above. Do not generate or create an image. Only write the final image-generation prompt.

**Idea / Action:**

She is walking through a lively seaside street while holding a small camera. She stops to look at a colorful storefront and smiles naturally.

**Location:**

A charming street in **Santorini, Greece**, with whitewashed buildings, blue details, bougainvillea, and the Aegean Sea visible in the distance.

**Wardrobe:**

A lightweight white linen dress, flat leather sandals, a woven shoulder bag, delicate gold jewelry, and sunglasses.

## **3. ChatGPT Builds the Prompt**

ChatGPT will transform your idea into a complete image-generation prompt using the **PYROS Express Image Prompt Template**.

It will handle the rest for you, including composition, camera, lighting, expression, depth of field, color grading, and character consistency.

You don't need to edit the generated prompt.

#### 4. Copy the Prompt to Flow

Copy the complete prompt generated by ChatGPT and paste it into **Google Flow**.

Select the **aspect ratio** you want for your image, depending on where you plan to use it.

#### 5. Attach Your Express Character Reference Sheet

Attach the **Express Character Reference Sheet** you created earlier to the generation.

The reference sheet provides the character identity, while your new prompt defines the scene.

Generate the image.

**That's it.**

You now have a new, ready-to-use social media image featuring the same consistent character.

# Conclusion

You've completed the **PYROS Express Workflow**.

You started with a single character image and transformed it into a reusable **Express Character Reference Sheet**.

You can now use that reference to create:

- **Professional social media profile pictures**
- **Different scenes and environments**
- **New poses and compositions**
- **Custom images based on your own ideas**

The key is simple:

**One Character → One Reference Sheet → Unlimited Image Possibilities**

Results will naturally vary depending on the AI model, prompt, and generation settings. However, starting with a structured Character Reference Sheet gives you a much stronger foundation for maintaining your character's identity across your images.

# What's Next?

The **Express Workflow** is the starting point of the PYROS Character Consistency Pipeline.

You've now created your **Express Character Reference Sheet** and learned how to use it to generate consistent AI images.

But the same reference sheet can also become the foundation for **AI video character consistency**.

## Available Now

### [Express Workflow — Part 1: Images](#)

Create a professional Character Reference Sheet from a single image and use it to create consistent AI images across different scenes, poses, and environments.

### [Express Workflow — Part 2: Video](#)

Learn how to use your **Express Character Reference Sheet as a character identity reference for AI video generation**.

You'll learn how to take the same character you've built in Part 1 and use it in video workflows while maintaining facial identity, appearance, and overall character consistency throughout your shots.

## Coming Soon

### **Cinematic Workflow**

Build enhanced Character Reference Sheets with additional visual references for characters that require greater detail and control.

**Thank you for supporting PYROS AI Creative.**
